

Firefox 1.0.1 basics

Allowing court CM/ECF popups, clearing cookies, clearing cache

How to configure to allow popups for court sites

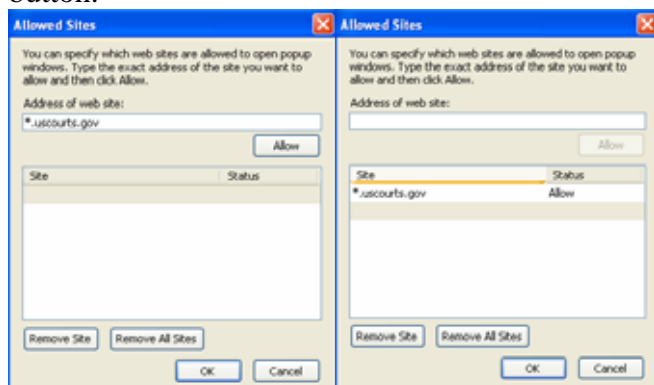

On the toolbar, go to “Tools\Options”

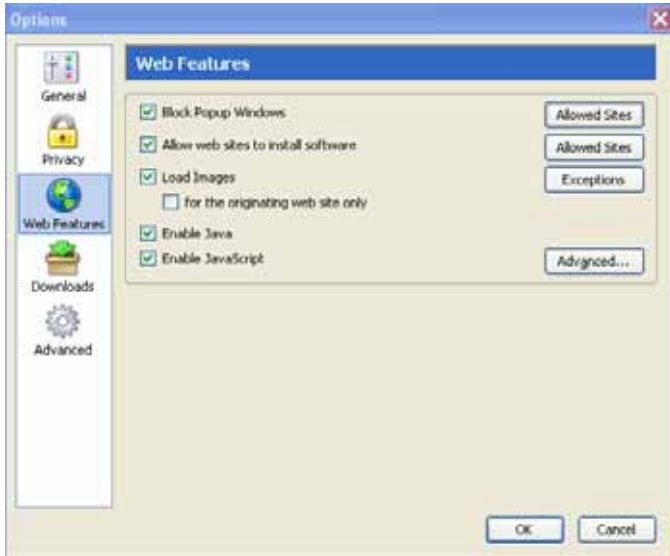

Click on the “Web Features” icon in the left window and then click on the “Allowed Sites” button on the side of the “Block PopUp Windows” check box

At this window you will type in “*.uscourts.gov” minus the quotes, then click the “Allow” button. Once the entry is in the bottom section of this window, click the “OK” button.

You will be brought back to the options window. You can click the “OK” button to close this window.

At this point you will be back at your FireFox browser. You can now use the browser to access CM\ECF.

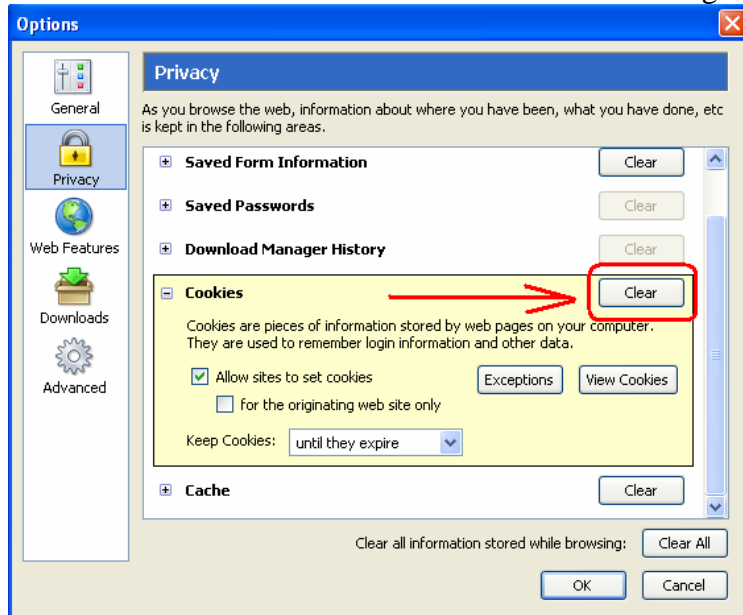

How to clear the cookies

On the toolbar, go to “Tools\Options”

Click on the “Privacy” icon located on the left side of the window.

From here click on the “Clear” button located to the right of “Cookies”

After the program has cleared all of the cookies on your computer the button will appear “greyed out”. This lets you know the process is complete. You can now click on the “OK” button and return to surfing the internet.

Hint -

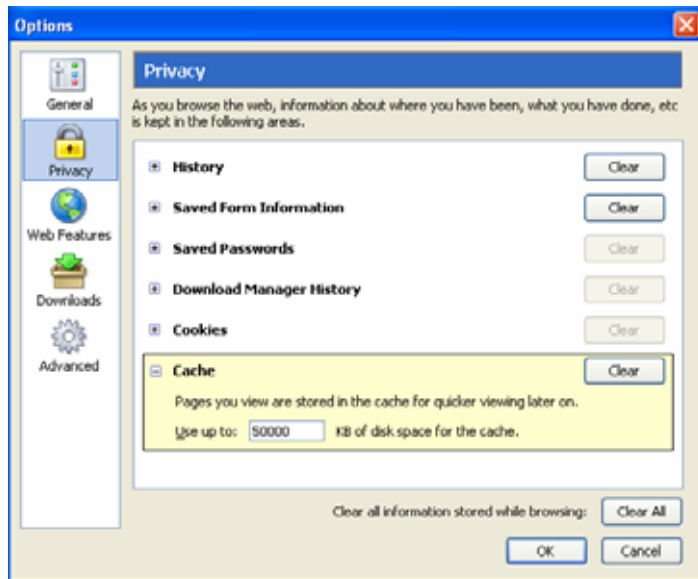

**Make sure that there is a check in the box to “Allow sites to set cookies”. You will need to have this setting to work within CM/ECF.

How to clear the cache

On the toolbar, go to “Tools\Options”

Click on the “Privacy” icon located on the left side of the window.
From here click on the “Clear” button located to the right of “Cache”

After the program has cleared the Cache on your computer the button will appear “greyed out”. This lets you know the process is complete. You can now click on the “OK” button and return to surfing the internet.
